### **WORK EXPERIENCE**

- Worked as Software Test Engineer at **Sementic Information Technology Pvt ltd.**
- Having **3.3 years** of Experience in **Automation** and **Manual Testing**.

### **PROFESSIONAL SUMMARY**

- Worked on **Agile Methodology**.
- Implemented **POM pattern design technique**.
- Experience in **API Automation** testing using **Rest Assured**.
- Worked with **Data Driven Frame work**.
- Worked with Page object model Framework.
- Worked on **TestNG** annotations.
- Good knowledge on **Oops concepts, Exception handling** and **Collections**.
- Good knowledge in **class and objects** initialization, declaration, **String, Access** control.
- Hands on using different types of **Locators**.
- Good expertise using **Xpath**.
- Experience of writing scripts using **TestNG Framework**.
- Well versed in handling the elements by using Selenium **Web Driver**.
- Have Knowledge on **Maven And Jenkins**.
- Have knowledge on **SQL** Queries.
- Handled **Exceptions**.
- Experience in reviewing the **Test Scripts**.
- Preparing Test Case Execution Report.
- Hands on experience in defect tracking using **JIRA**.
- Involved in daily stand-up meetings.
- Good Exposure in **GIT** commands and handling conflicts.
- Maintain the test script in **GIT** repository.
- Involved in **GIT, MAVEN** and **JENKINS** Integration.

- Involved in analyzing Functional requirements.
- Experience in writing **Test Scenarios** and **Test Cases** based on Test Case Design Techniques.
- Involved in **Smoke Testing** in every test life cycle.
- Well acquainted with Software development life cycle (**SDLC**) and Software test life cycle (**STLC**).
- Experience in converting manual test cases into automation scripts using selenium in Eclipse.
- Expertise in handling different types of popup.
- Experience in **RESTFULL** web service testing using Rest Assured Framework java.
- Experience in validated **JSON** formatted data, different **HTTP status** code like 200,201,400, 403 and 500 etc.
- Experience in working with **Postman**.
- Good knowledge in supported request Authentication.
- Knowledge on **CRUD** operations using **Rest Assured**.
- Good Exposure in **HTTP** request and **HTTP** Response.
- Involved in verifying the responses using **JSON path**.
- Good knowledge on Rest Assured **Framework**.
- Knowledge on creation in complex post request in **Rest Assured**.
- Used **TestNG** testing tool in Rest Assured.

## **TECHNOLOGIES**

- **Test Automation Tools** : Selenium Web Driver, TestNG
- **Test Management Tools** : JIRA
- **Version Control** : Git
- **Dependencies Tool** : Maven
- **Continuous Integration Tool**: Jenkins
- **Programming Language** : Core Java,C#
- **API Testing** : REST Assured, REST Client
- **Database** :MYSQL

## **PROJECT DETAILS**

### **Project #2**

**Title** : Agri Business

**Client** : Webimax

**Technologies** : Java, Selenium Web Driver, Manual Testing, TestNG

**Description:**

This application is designed for Formers, where they can buy Forming products from their place. When Formers use this application they can buy, try the products at home and if they like the product they can buy the product. It will be available for Formers 24/7 to do Forming. By using this software the Owner of the product is also getting benefits because he is running his business 24/7. It also provides Security measures, Payment Options.

**Roles and Responsibilities:**

- Involved in developing automation scripts for assigned user story.
- Creating POM (Page Object Model) classes for the elements of the app screens.
- Involved in performing web automation testing.
- Performed CRUD operations using Rest Assured.
- Involved in writing the end to end test scripts for automating the web services using Rest Assured.
- Validated JSON formatted data and different http status codes.
- Involved in verifying the responses using JSON Path.
- Analysis of test requirement and automation feasibility for web application.
- Created functional automation scripts using Selenium Web driver.
- Implemented the POM design pattern to create POM classes.
- Involved in preparing Test Data's for the test cases and automating scripts using Data Driven Concept.
- Designed and executed the Test scripts on various browser types.
- Performed batch and parallel execution to perform the regression testing.
- Logged defects encountered in the application through JIRA during test cycles and conducted fix verification
- Participated in daily scrum meetings and weekly status update meeting

**Project #1**

**Title** :   
**Client** :   
**Technologies** : Manual Testing

**Description:**

This is basically about online jewellery trading business i.e. Buy artificial, handmade, or real jewellery direct from manufacturers and sell it online for higher prices. Whenever the customer wants jewellery through the online they will approach to this application. They open the site and search for their favourite product and click on order it. Then business team get the notification of that particular product .they can send product to the customer.

## **Roles and Responsibilities:**

- Involved in analysing the requirement specifications of the application.
- Handled the project using Agile Scrum Methodology.
- Involved in identifying the scenarios, writing test cases and execution of test cases.
- Performed various Black box testing Methodologies like Smoke testing, Functional testing, Integration testing, Compatibility testing, Retesting and Regression testing.
- Logged defects encountered in the application through JIRA during test cycles.
- Participated in daily scrum meetings.
- Responsible for Daily and Weekly Status report.

## **ACADEMIC PROFILE**

- **B. Tech** graduate from **LAQSHYA INSTITUTE OF TECHNOLOGY ANDSCIENCES** in ECE.

## **PERSONAL DETAILS**

- **Date Of Birth** : 02/07/2000
- **Address** : 12/2/E/1, 1st floor, 1st cross, 1st stage, 1st colony, Near YSR MCH, Nagar, Hyderabad PINCODE 500020

## **DECLARATION**

I hereby declare that above written particulars are true to the best of my knowledge and belief.

**Place:** Hyderabad

**Date:**
